

Hi

We are delighted to invite you to visit our booth #6848 at the upcoming HIMSS22.

[IMedis'](#) flagship product, Duali-Q provides a cloud-based, automated QA solution that aggregates and reviews data from PACS and RIS to perform thorough analysis on your radiology reporting.

Duali-Q is currently in use at some of the leading teaching hospitals in the US, UK and Israel, allowing management and follow-up of errors of omission in CT scans of the chest and the abdomen serves as a safety-net for previously undetected life-threatening conditions. Improved radiology QA can translate into reduced risks, new business opportunities, and increased financial efficacy.

We [invite you to meet in person](#) to discuss how our AI solution can augment your existing QA activities.

Please respond to this email to schedule a personal meeting at HIMSS or a call if you're not attending this year.

Looking forward to hearing from you,

Noam Sorek

VP Sales and Business Development
